

SCoRE®

Point Of Sale

Retail/Consignment Inventory

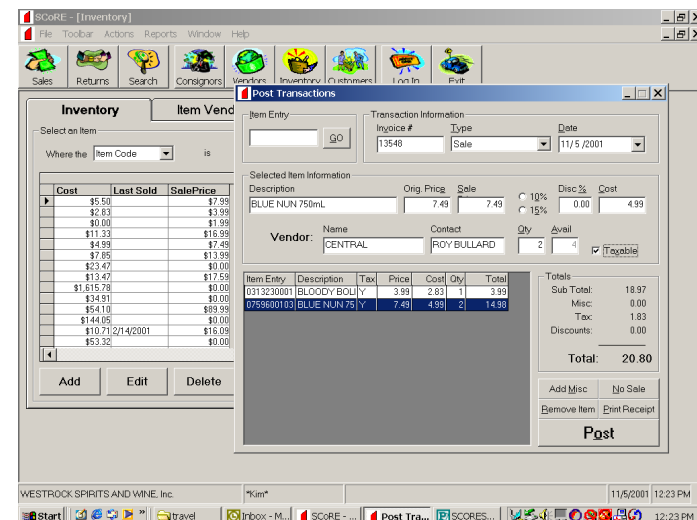

Fully Automated Point of Sale and Inventory Management for Retail and Consignment Sales

Solve all of your Point of Sale and Inventory Management needs with our fully automated counter POS and inventory maintenance solution — SCoRE®. With SCoRE® you will be confident that your sales and inventory operations will be fully integrated, accurate, and real-time.

Robust and secure, Windows® based SCoRE® utilizes and supports the most current technologies and works with just about any ODBC compliant database, insuring platform independent database support. SCoRE® supports a wide range of POS hardware options including scanners, cash drawers, receipt and label printers, pole displays, and other peripherals. Stand alone and full network versions are available.

Developed to support both Retail and Consignment sales and capable of managing operations for both concurrently, SCoRE® will handle just about any type of sales transaction. Full inventory and sales control, as well as a wide array of reporting options are available for pre and post sales. Not only are your sales easily managed, but also returns, discounting, credits, layaways, and special programs such as gift certificates are all available and easy to use.

System Requirements

1. 100% IBM Compatible Pentium class or higher.
